EPOXY CAST IRON DRAINAGE PIPE SYSTEM EN877

DSI

EPOXY CAST IRON DRAINAGE PIPE SYSTEM EN877

Introduction

Made from 100% recyclable materials, DSI epoxy cast iron pipe systems are not only environmental friendly, but also satisfy many properties necessary to withstand the aggressive conditions both internal and external of the pipes and fittings; these properties include its excellent resistance to abrasion, corrosion, impact and fire. DSI also has low noise transmission compared to common uPVC drainage pipe systems. DSI is designed as long lasting building materials. It had customers appalled with the ease and speed of installation.

引言

由100%可循環再用物料製造的DSI紅坭系列不但環保，並且管道內外均具備抵受外來環境侵害的特性包括：高度防磨損、抗銹蝕、耐撞擊、防火。相較於一般的uPVC塑膠去水系統，DSI紅坭更具有低噪音的性能。DSI紅坭是一種耐用的去水管道，其安裝便捷的優點，深受用家歡迎。

Standard

DSI epoxy cast iron pipe systems with nominal size between 40-300mm comply with BSEN877. BSEN877 guarantees the quality of the materials, dimensions and tolerances, mechanical properties (like water pressure, tensile strength and brinell hardness) appearance, and standard coatings for the epoxy cast iron pipes, fittings and couplings.

產品規格

DSI紅坭系列的尺寸由40mm至300mm，均符合BSEN877標準，保證其品質——用料、尺寸、機械性能（如水壓、拉力、硬度）外表及保護層——達到理想標準。

Strength

Iron is well known for its strength and abrasion resistance. The shape and impact strength of DSI products are unchanged under exposure of sunlight and weathering, while uPVC and PVC pipes would soften, deform and become brittle under intense temperature change.

高強度

鐵的強度高、能抗磨損是人所共知的，縱使在風雨日曬下，DSI紅坭的形狀及撞擊強度不會因而改變或減弱；相反，uPVC及PVC塑膠去水喉會受溫差的影響而變軟、變形及變脆。

Quiet

DSI's sturdy and dense properties reduce pipe vibration creating a silent drainage system. Studies had proven iron is the quietest material out of all other common drainage pipe materials. Due to KAM's naturally silent characteristics, no complicated and costly sound insulation is needed.

低噪音

DSI紅坭結實而高密度的特性可減少喉管的震動，形成安靜的管道系統。鐵已被證實為眾多去水物料中最安靜的材料。由於KAM紅坭低噪音的特性，可以免除繁複而昂貴的隔音裝置。

Non-Toxic and Non-Combustible

No toxic gas will be emitted from DSI in the event of a fire. Iron is also non-combustible so DSI epoxy cast iron pipes and fittings are recoverable after a fire.

無毒及不易燃

火警發生時，DSI紅坭不會釋放有毒氣體。由於鐵是一種不易燃的物料，DSI紅坭及配件在火警後可以重用。

DSI

EPOXY CAST IRON DRAINAGE PIPE SYSTEM EN877

Anti-Corrosive

All DSI epoxy cast iron pipes and fittings are internally and externally finished with corrosive resistant epoxy coating to prevent fouling and corrosion. The epoxy coating on DSI epoxy cast iron pipes and fittings provides an excellent exterior under humid and tropical conditions. With the increasing use of domestic chemicals, such as organic acids and caustic soda, the epoxy interior is the perfect solution to handle the corrosive substances. The epoxy coating also provides a smooth path for solid waste creating a block-free interior. Around the world, epoxy cast iron pipes are widely used in laboratories, hospitals, factories and homes because of its corrosive resistant property.

抗銹蝕

DSI紅坭及配件的內外層均塗上防銹的環氧樹脂以防結垢及防銹蝕。在潮濕多雨的熱帶環境下，DSI紅坭外層的環氧樹脂塗層為管道提供良好的保護。在家用化學劑如有機酸、苛性鈉等的用量日漸增多下，環氧樹脂塗層是對抗侵蝕物質的最佳屏障，同時亦造成了一個平滑的管道來防止污物阻塞。紅坭具有抗腐蝕的特性，令其廣泛應用於世界各地之實驗室、醫院、工廠及住宅等。

Couplings

Lightweight couplings are specially engineered to guarantee a strong, quick and easy connection between DSI pipes and fittings. Made from stainless steel with rubber gaskets, the couplings match the pipe and fittings' non-corrosive properties.

喉箍

精密設計的喉箍可以穩固、快捷及容易地接駁DSI紅坭，而且極之輕身。配合紅坭喉管及管件抗銹蝕的特性，紅坭箍採用的材料為不銹鋼及橡膠墊圈。

Assembly Instructions 安裝指引

1. 將喉箍的膠圈套在管端外，至膠圈深度的一半
Fit the rubber gasket on the outer rim of the pipe until it is half way into the gasket.
2. 將上半段的膠圈外翻
Roll back the upper half of the rubber gasket outwards.
3. 放另一段的喉管或配件套入膠圈內，再翻回膠圈
Place the connecting pipe or fitting into the rubber gasket and fold back the gasket.
4. 套上不銹鋼喉箍及將螺絲收緊
Wrap the stainless steel coupling around the rubber gasket and alternately tighten bolts.
